*è la collezione in gres porcellanato dall'estetica ispirata a un mix di pietra e cemento, caratterizzata da un'elevata poliedricità compositiva. L'effetto cemento assume un sapore vissuto prestandosi a molteplici stili d'arredo in ambienti dove il contemporaneo incontra un mood industriale*

*the collection of porcelain stoneware whose aesthetic is inspired by a mix of stone and concrete, characterized by a high compositional versatility. Cement effect conveys a "worn" flavour to it thus being particularly suitable for different design styles in spaces where the contemporary meets an industrial mood*

A modern bathroom scene featuring a white freestanding bathtub on a dark, textured rug. The bathtub is supported by thin black legs and has a light-colored towel draped over its side. **IL PROGETTO**

È di fondamentale importanza capire in quali luoghi è consigliato l'utilizzo di materiali lappati e levigati a campo pieno. Sono indicati ambienti residenziali di pregio, sale da bagno o eleganti spazi commerciali, ma anche tutti gli spazi pubblici soggetti a calpestio medio-basso.

Nelle zone soggette, invece, ad intenso passaggio come ingressi principali, hall, ecc. è necessario prevedere l'utilizzo di stuoie o tappeti.

**LA POSA**

Il posatore, in quanto responsabile dei lavori, deve essere sempre scelto con la massima cura e deve essere a conoscenza di alcune norme da rispettare scrupolosamente.

In particolare sono fortemente consigliate le moderne fughe a base cementizia semplice, mentre è sconsigliato l'uso di fuganti a base epossidica. Prima dell'utilizzo il posatore deve verificare la compatibilità dei riempitivi per le fughe con la piastrella lappata o levigata seguendo le istruzioni fornite dai produttori di fuganti fatti appositamente per questo tipo di prodotti, rispettando scrupolosamente i tempi di posa e pulizia consigliati. Una volta terminato il lavoro è importante rimuovere i residui dei riempitivi per le fughe quando gli stessi sono ancora freschi.

**LA PRIMA PULIZIA**

Prima della consegna del lavoro finito e prima dell'utilizzo del pavimento, è necessario che il posatore effettui un lavaggio dopo posa per rimuovere tutti i residui e il normale sporco di cantiere. Nella realizzazione di questa fase è importante che venga utilizzata abbondante acqua pulita per non rovinare il lavoro eseguito.

Una volta trascorsi i tempi di stagionatura dello stucco cementizio è opportuno procedere ad una pulizia più profonda con detergente tipo FABER CEMENT REMOVER o equivalente, attenendosi scrupolosamente alle istruzioni d'uso e diluizioni indicate sulla confezione dal produttore. In caso di utilizzo di stucchi epossidici, rimuoverli FABER EPOXY CLEANER. Prima di lavare è necessario spazzare/aspirare bene il pavimento per poi procedere al lavaggio distribuendo uniformemente la soluzione diluita utilizzando un normale mop-lavapavimenti (mocio), oppure una monospazzola dotata di dischi con tampone di colore verde (MORBIDO) per le grandi superfici. Lasciare agire il prodotto per qualche minuto e risciacquare abbondantemente con acqua calda e pulita, ripetendo il procedimento con cura fino alla completa eliminazione di qualsiasi alone o residuo. Al termine della posa e del lavaggio, se si dovessero riscontrare imperfezioni nel prodotto è bene rivolgersi al rivenditore e/o contattare il nostro ufficio tecnico.

**LA PULIZIA ORDINARIA**

Affinchè il prodotto levigato o lappato (polished) mantenga la sua naturale lucentezza, la pulizia ordinaria deve essere sempre eseguita con abbondante acqua tiepida utilizzando FABER FLOOR CLEANER o normali detersivi domestici a base neutra.

**ATTENZIONE**

Nonostante alcuni prodotti pubblicizzino il "non risciacquo" è sempre bene procedere ugualmente con questa fase.

È necessario evitare l'utilizzo di prodotti eccessivamente acidi o eccessivamente basici, spugne abrasive, macchine lucidatrici e cere lucidanti. È consigliato l'utilizzo di lavapavimenti ad acqua e/o a vapore (con acqua decalcificata) sempre e solo in abbinamento a detersivi neutri.

Ricordiamo che i nostri prodotti sono stabili e continuamente controllati. L'uso corretto e un trattamento adeguato non causeranno danni al materiale. I nostri prodotti vengono costantemente sottoposti a tutti i test di resistenza alle macchie previsti dalle norme UNIEN.

Come specificato dalla norma UNI 11493:2013 paragrafo 5.2.2: "L'esame visivo della piastrellatura deve essere effettuato da una distanza minima di 1,5 m ad altezza d'uomo. Non è consentita l'illuminazione in luce radente. Gli effetti superficiali non rilevabili in queste condizioni non sono da considerare come difetti."

Unicomstarker declina ogni responsabilità qualora non venissero rispettate le sopra citate norme di posa, pulizia, e manutenzione.

**PLANNING**

It is of primary importance to figure out where to employ polished and semi-polished tiles. This kind of material is suitable for luxurious housing environments, bathrooms or refined commercial locations as well as public spaces subject to a low-medium foot traffic.

High-traffic areas, such as: main entrances, halls, etc. shall be protected by mats or carpets.

**TILE LAYING**

The operator in charge of installation shall be picked out attentively and shall have a thorough knowledge of a few rules and abide by them scrupulously.

The modern simple cement-based grouts are highly recommended while we advise against using epoxy-based fixing mortar.

Before laying, the installer shall check that the filling grouts for joints perfect fit the polished and semi-polished tiles. Furthermore, the layer has to follow the instructions given by the grout and mortar manufacturers and keep to the recommended laying times and scheduled cleaning strictly. After grouting it is important to remove all traces of remaining filling materials when these are still wet.

**FIRST CLEANING:****POST-INSTALLATION AND PRIOR TO HANDOVER**

Prior to handover the finished work and prior to the tiled floor being used, the tile layer is responsible for washing the floor after the installation process to remove any grout residue and site dirt and dust. In this first process of cleaning use plenty of clean water thus preventing the just tiled floor from being damaged.

Once the cement-based grout has cured, it is advisable to clean thoroughly using a detergent, FABER CEMENT REMOVER or equivalent product, by following the directions for use to the letter and at the dilutions recommended by the manufacturer as specified on the product packaging. If epoxy-based grouts are used, clean up any residue using FABER EPOXY CLEANER. Prior to washing, sweep/vacuum the floor thoroughly and then wash by applying the diluted solution to the section of floor being cleaned evenly using a normal floor mop. For large spaces, clean using a single brushing machine with green pad (SOFT). Let the cleansing solution sit on the tiles for a few minutes and then wipe it away rinsing with warm and clean water thoroughly. Repeat this process until no haze or residue remains. Should any flaws become apparent after tile laying and cleaning, please contact the store and/or our technical office.

**ROUTINE CLEANING**

In order for polished or semi-polished tiled floor to maintain its natural shine, it should be regularly washed with plenty of lukewarm water and FABER FLOOR CLEANER or a normal neutral-based household detergent.

**IMPORTANT NOTE**

Even if some products write "no rinsing required" it is recommended to rinse out after use.

Do not use too acid or too basic products, abrasive sponges, floor polishers and waxes. It is recommended to use a water and/or steam (with decalcified water) floor washer in combination with neutral detergents. Please note that our products are stable and constantly checked. A correct use and a proper treatment will avoid any damage to the material.

In addition, our products are constantly subject to stain resistance tests, as provided for by UNI EN standards.

According to UNI 11493:2013 Standard, paragraph 5.2.2: "A tiled floor shall be visually inspected at a minimum distance of 1.5 m at eye-level. Oblique lighting is not allowed. Surface effects that under these conditions could not be detected, shall not be considered as a defect."

Unicomstarker declines all responsibility for damages caused by non-observance of the above recommended instructions for laying, cleaning and maintenance.

## NORME DI POSA E MANUTENZIONE MATERIALI LEVIGATI A CAMPO PIENO

LAYING AND MAINTENANCE INSTRUCTIONS FOR POLISHED TILES - RÈGLES POUR LA POSE ET L'ENTRETIEN DES  
CARREAUX POLIS - GEBRAUCHANWEISUNG FUER VERLEGUNG UND PFLEGEVON POLIERTEN MATERIALIEN

**LE PROJET**

Il est très important de comprendre la destination d'utilisation des carreaux polis et semi-polis.

Ce type de produit est approprié pour environnements de logement de luxe, salles de bains et locaux commerciaux élégants ainsi que tous les espaces publics soumis à un trafic modéré-moyen.

Les zones de passage intensif, tels que: entrées principales, salles, etc. doivent être protégées par des nattes ou des tapis.

**LA POSE**

Nous recommandons vivement de confier la pose à un poseur professionnel qui doit avoir une connaissance approfondie de certaines règles et les respecter scrupuleusement.

Les mortiers modernes à base de ciment sont particulièrement recommandés pendant que nous déconseillons l'utilisation de coulis à l'époxy.

Avant la pose, l'installateur doit vérifier que le matériaux de remplissage pour joints soient appropriés pour carreaux polis et semi-polis et doit suivre les instructions fournies par les fabricants de mortier en se tenant strictement aux temps de pose et de nettoyage recommandés.

Après le jointoiment, il faut éliminer rapidement tout résidu de mortier sur les carreaux lorsqu'il est encore frais.

**PREMIER NETTOYAGE «APRÈS LA POSE» ET AVANT LA LIVRAISON**

Avant de remettre et d'utiliser le sol carrelé, le carreleur est responsable du lavage des carreaux fraîchement posés afin d'éliminer tous les résidus après la pose et les salissures de chantier. Ce premier processus de nettoyage doit être effectué soigneusement et avec beaucoup d'eau propre, ce qui évite d'endommager le sol juste carrelé.

Une fois que le délai de séchage du mortier de jointement à base de ciment s'est écoulé, il faut procéder à un nettoyage soigneux avec un détergent type FABER CEMENT REMOVER ou un produit équivalent, en respectant scrupuleusement le mode d'emploi et les proportions de dilution indiquées sur l'emballage par le fabricant. Lorsque vous utilisez des mortiers de jointement à base époxy, éliminez tous les résidus en utilisant le détergent FABER EPOXY CLEANER. Avant le nettoyage, passer un aspirateur/balayer soigneusement le sol, puis le laver en appliquant la solution diluée uniformément sur la section de sol à nettoyer avec un balai serpillière normal. Pour les grandes surfaces, vous pouvez utiliser une monobrosse munie de disques avec patin vert (SOUPLE). Laissez agir sur les carreaux pendant quelques minutes, puis rincez soigneusement et abondamment à l'eau tiède et propre. Répétez ce processus jusqu'à élimination complète de tout halo ou résidu. Si des imperfections surviennent à la fin de la pose ou après lavage, s'adresser au revendeur et/ou contacter notre bureau technique.

**NETTOYAGE DE ROUTINE**

Pour que le carrelage poli ou semi-poli conserve les caractéristiques de brillance, il doit être régulièrement nettoyé avec beaucoup d'eau tiède et le détergent FABER FLOOR CLEANER ou un détergent domestique normal à base neutre.

**AVERTISSEMENT**

Même si certains produits sont classés comme "sans rinçage", il est recommandé de rincer après utilisation.

Ne pas utiliser des produits trop acides ou trop basiques, des éponges abrasives, des lustreuses et des cires. Il est recommandé d'utiliser une machine de nettoyage à l'eau et/ou à la vapeur (avec eau adoucie) toujours et uniquement en combinaison avec des détergents neutres.

Nos produits sont stables et contrôlés continuellement. Une utilisation correcte et un traitement approprié éviteront des dommages au matériel. En outre, nos produits sont constamment soumis à des tests de résistance aux taches, comme prévu par les normes UNI EN.

Selon le paragraphe 5.2.2 de la Norme UNI 11493.2013: "L'examen visuel du carrelage doit être effectué à une distance minimale de 1,5 m à hauteur des yeux. L'utilisation de lumière rasante est interdite. Les effets de surface qui ne peuvent pas être détectés dans ces conditions, ne doivent pas être considérés comme des défauts."

Unicomstarker décline toute responsabilité en cas de dommages causés au carrelage découlant du non-respect des instructions ci-dessus recommandées pour la pose, le nettoyage et l'entretien.

**PLANUNG**

Es ist sehr wichtig herauszufinden, an welchen Orten die polierten und teilpolierten Fliesen verlegt werden sollen. Dieses Material ist geeignet zur Verlegung in Luxuswohnungen, Bädern oder Einkaufszentren sowie auch für alle öffentlichen Bereiche mit mittel-niedrigem Fußgängerverkehr.

Passagen mit intensivem Durchgang wie Haupteingänge, Hallen usw. sollten durch Matten oder Teppiche geschützt werden.

**FLIESENVERLEGUNG**

Der für die Verlegung verantwortliche Arbeiter sollte mit Bedacht ausgewählt werden, da er über gründliche Kenntnisse verfügen muss und es einige Regeln zu beachten gilt, die gewissenhaft zu befolgen sind.

Besonders die modernen, einfachen zementbasierten Fugen sind zu empfehlen, während die Verwendung von Epoxid-basiertem Fugenmörtel nicht ratsam ist.

Vor der Verlegung sollte der Bodenleger prüfen, ob der Füllstoff für Fugen perfekt zu polierten und teilpolierten Fliesen passt. Er sollte auch die Anweisungen der Hersteller des Fugenmörtels, der speziell für diese Art von Produkt entwickelt wurde, sowie die empfohlenen Verlege Zeiten und die vorgesehene Reinigung genau befolgen.

Nach der Stuckatur ist es wichtig, alle Spuren von restlichem Fugenfüllstoff zu entfernen, solange diese noch feucht sind.

**ERSTE REINIGUNG NACH DER „FLIESENVERLEGUNG“ UND VOR DER ÜBERGABE**

Vor Übergabe und Nutzung des fertigen Bodens ist der Fliesenleger für das Abwaschen der frisch verlegten Fliesen verantwortlich, um alle Verlegerückstände und normalen Baustellenschutz- und Staub zu entfernen. Dieser erste Reinigungsprozess soll gründlich und mit reichlich sauberem Wasser erfolgen, um zu verhindern, dass der gerade geflieste Boden beschädigt wird.

Sobald der zementhaltige Mörtel ausgehärtet ist, muss eine gründliche Reinigung mit FABER CEMENT REMOVER oder einem gleichwertigen Reinigungsmittel erfolgen. Dabei sind die auf der Verpackung aufgedruckten Anweisungen des Herstellers für den Gebrauch und eventuell vorzunehmender Verdünnung strengstens einzuhalten. Bei Verwendung von Epoxidmörtel sind alle Rückstände mit FABER EPOXY CLEANER zu entfernen. Vor der Reinigung den Boden gründlich fegen/absaugen und anschließend waschen, indem die verdünnte Lösung mit einem normalen Bodenwischer gleichmäßig auf den zu reinigenden Bodenabschnitt aufgetragen wird. Für größere Flächen können Sie eine Scheibe mit grünem Pad (SOFT) ausgestattete Einbürstenreinigungsmaschine verwenden. Lassen Sie die Reinigungslösung einige Minuten auf den Fliesen wirken und spülen sie diese dann mit gründlich warmem und sauberem Wasser ab. Wiederholen Sie diesen Vorgang, bis keine Schleier oder Rückstände mehr vorhanden sind. Sollten nach dem Verlegen und Reinigen der Fliesen Mängel festgestellt werden, wenden Sie sich bitte an den Händler und/oder unsere technische Abteilung.

**ROUTINE-REINIGUNG**

Damit polierter oder halbpolierter Fliesenboden seinen natürlichen Glanz behält, sollte eine Routine-Reinigung regelmäßig mit reichlich lauwarmem sauberem Wasser und FABER FLOOR CLEANER oder einem normalen neutralen Haushaltsputzmittel erfolgen.

**WICHTIGER HINWEIS**

Auch wenn für einige Produkte "Kein Spülen erforderlich" empfohlen wird, ist es ratsam, diese nach dem Gebrauch auszuspülen.

Verwenden Sie keine zu sauren oder zu basischen Produkte, Scheuerschwämme, Bohnerwache oder ähnliches. Verwenden Sie eine Wasser und / oder Dampf- Reinigungsmaschine (mit entkalktem Wasser) in Kombination mit neutralen Reinigungsmitteln.

Unsere Produkte sind stabil und ständig überprüft. Durch eine korrekte Verwendung und ordnungsgemäße Behandlung wird eine Beschädigung des Materials vermieden.

Darüber hinaus werden unsere Produkte gemäss UNI EN-Normen ständig Fleckenbeständigkeitstests unterzogen.

Laut Uni 11493.2013 Absatz 5.2.2: "Ein Fliesenboden sollte aus einer Mindestentfernung von 1,5 m in Augenhöhe überprüft werden. Schräg einfallendes Licht ist nicht erlaubt. Oberflächeneffekte, die unter diesen Bedingungen nicht erkannt werden konnten, sind nicht als Fehler zu betrachten"

Unicomstarker übernimmt keine Verantwortung für Schäden, die durch Nichtbeachtung der oben genannten empfohlenen Hinweise zu Verlegung, Reinigung und Pflege verursacht werden.
