Colorker[®]

Time to inspire[♦]

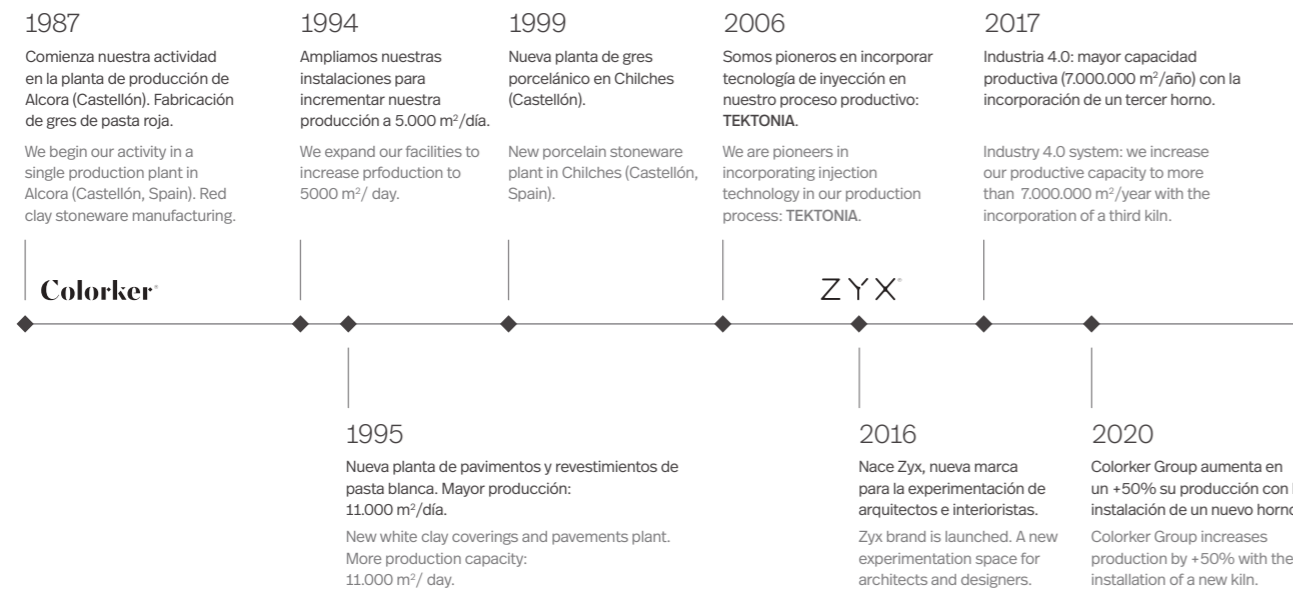

Desde 1987

En 1987, Colorker nacía de la mano de un grupo de emprendedores provenientes de la industria cerámica que compartía un mismo propósito: crear productos cerámicos que despertaran emociones. Años después Colorker ha evolucionado y expandido su visión, convirtiéndose en un grupo empresarial que apuesta constantemente por mantenerse a la vanguardia de la creatividad y la tecnología.

Desde Colorker apostamos por la innovación en nuestros sistemas, procesos y áreas de trabajo para alcanzar los mayores estándares de calidad. Somos una empresa en constante evolución que, sin renunciar a su pasado ni perder de vista toda la experiencia acumulada, se reinventa constantemente para contribuir a la evolución de los proyectos de arquitectura e interiorismo.

Colorker was founded in 1987 by a group of entrepreneurs in the tile industry who shared the same purpose: to create ceramic products that stir emotions. Years later, Colorker has evolved and broadened its vision, becoming a business group that constantly strives to stay at the forefront of creativity and technology.

At Colorker, we are committed to innovation in our systems, processes and work areas to achieve the highest quality standards. This is a company that is constantly evolving, without renouncing its past or losing sight of all the experience we've gained, and constantly reinventing itself to contribute to the evolution of architecture and interior design projects.

SINCE 1987

Cuidamos nuestro planeta

En Colorker estamos comprometidos con nuestro entorno y el futuro de nuestro planeta. Es por ello que la reducción del impacto medioambiental de nuestra actividad va más allá de nuestras propias instalaciones, diseñando productos que contribuyen a reducir el consumo energético.

Nuestro Plan de Gestión Ambiental apuesta por acciones que disminuyen de forma contundente el negativo impacto que tiene la industria sobre el planeta. Esto nos ha permitido obtener diferentes certificaciones que avalan nuestro compromiso con el entorno.

At Colorker, we are committed to our environment and the future of our planet. That is why our commitment to reducing our environmental impact goes beyond our own facilities, as we design products that contribute to minimising energy consumption.

Our Environmental Management Plan includes actions that drastically reduce the negative impact that the industry has on the planet. This has allowed us to obtain various certifications that support our commitment to the environment.

Colorker®

Fabricado y diseñado en España

Durante los últimos años, el sector de la industria ha sufrido una marcada deslocalización de sus plantas de producción hacia países donde los recursos son más económicos. En Colorker somos pioneros en la marca Tile Of Spain, asegurando que todos y cada uno de nuestros productos han sido fabricados en España.

In recent years, the industry sector has suffered from a notable relocation of its production plants to countries where resources are more economical. At Colorker, we are pioneers of the Tile Of Spain label, ensuring that each and every one of our products has been manufactured in Spain.

MADE AND DESIGNED IN SPAIN

Pioneros en Industria 4.0

La digitalización y la mejora continua de sus procesos son dos de las firmes apuestas de Colorker. La compañía es una de las primeras empresas cerámicas en la implantación de un sistema de industria 4.0 que convertirá la fábrica tradicional en una industria de producción inteligente. Actualmente, la empresa cuenta con un software de gestión MOM (Manufacturing Operations Management) junto con habilitadores digitales como el Big Data, IoT (Internet of Things) o Machine Learning, que integra todos los sistemas de la fábrica, consolidando así los datos relevantes en un único punto. Cada pieza dispone, además, de su propio código QR, que permite conseguir una total trazabilidad, pudiendo consultar en cualquier momento los datos de fabricación de las piezas, así como la optimización y mejora continua de los procesos. También se está trabajando en la implementación de herramientas de marketing dentro del código QR, para que, además de toda la información de fabricación, el cliente pueda contar con todo lo necesario para la venta desde el momento en el que recepcione las piezas cerámicas

Digitalisation and the continuous improvement of its processes are two of Colorker's firmest commitments. The company is one of the first tile companies to implement an Industry 4.0 system, which will turn traditional factories into a smart production industry. Currently, the company uses MOM (Manufacturing Operations Management) management software as well as digital tools such as Big Data, IoT (Internet of Things) and Machine Learning, which links all the factory's systems, thus keeping all relevant data in a single point. Each piece also has its own QR code, allowing for end-to-end traceability as you can check the pieces' manufacturing data at any time, as well as optimisation and continuous improvement of processes. We are also working on implementing marketing tools within the QR code so that, in addition to all the manufacturing information, customers can have access to everything they need for the sale from the moment they receive the ceramic pieces.

Producto final de máxima calidad y garantía
Top-quality end product with full guarantee

USO DEL CATÁLOGO

Use of the catalogue

La reproducción de los colores es aproximada debido a los sistemas de impresión. Los códigos de precios y las referencias deben verificarse ya que pueden haber errores tipográficos. El fabricante se reserva el derecho de modificar las características del packing según las condiciones del pedido.

Given the printing systems in use, the colours reproduced herein are roughly equivalent to actual ones. Price code and product codes should be checked since there be typographical errors. The manufacturer reserves the right to modify the characteristics as per the terms and conditions of the order.

Variación cromática

Colour variation

| | | | |
|---------------------|------------------------------------|---------------------------------------|---------------------------|
| V1 | V2 | V3 | V4 |
| Uniforme Uniform | Variación leve Slight variation | Variación media Moderate variation | Variación alta Uniform |

¿QUÉ SIGNIFICA V1, V2, V3, V4?
Indica el nivel de destonificación de la colección. Indica la variedad de tonalidades –entendida como riqueza de colores– que una misma pieza puede experimentar. Se establece una escala del 1 al 4, en la que 1 (V1) indica poca o nula destonificación (uniforme); 2 (V2), una destonificación leve; 3 (V3) destonificación media; y 4 (V4), destonificación alta.

WHAT DOES V1, V2, V3, V4 MEAN?
Indicates the degree of shade variation in the collection. Indicates the variety of tones –understood as the richness of colours– that one same piece can have. The scale goes from 1 to 4, in which 1 (V1) indicates little or no shade variation (even); 2 (V2), a slight shade variation; 3 (V3) medium shade variation; and, 4 (V4) high shade variation.

Variación gráfica

Graphic variation

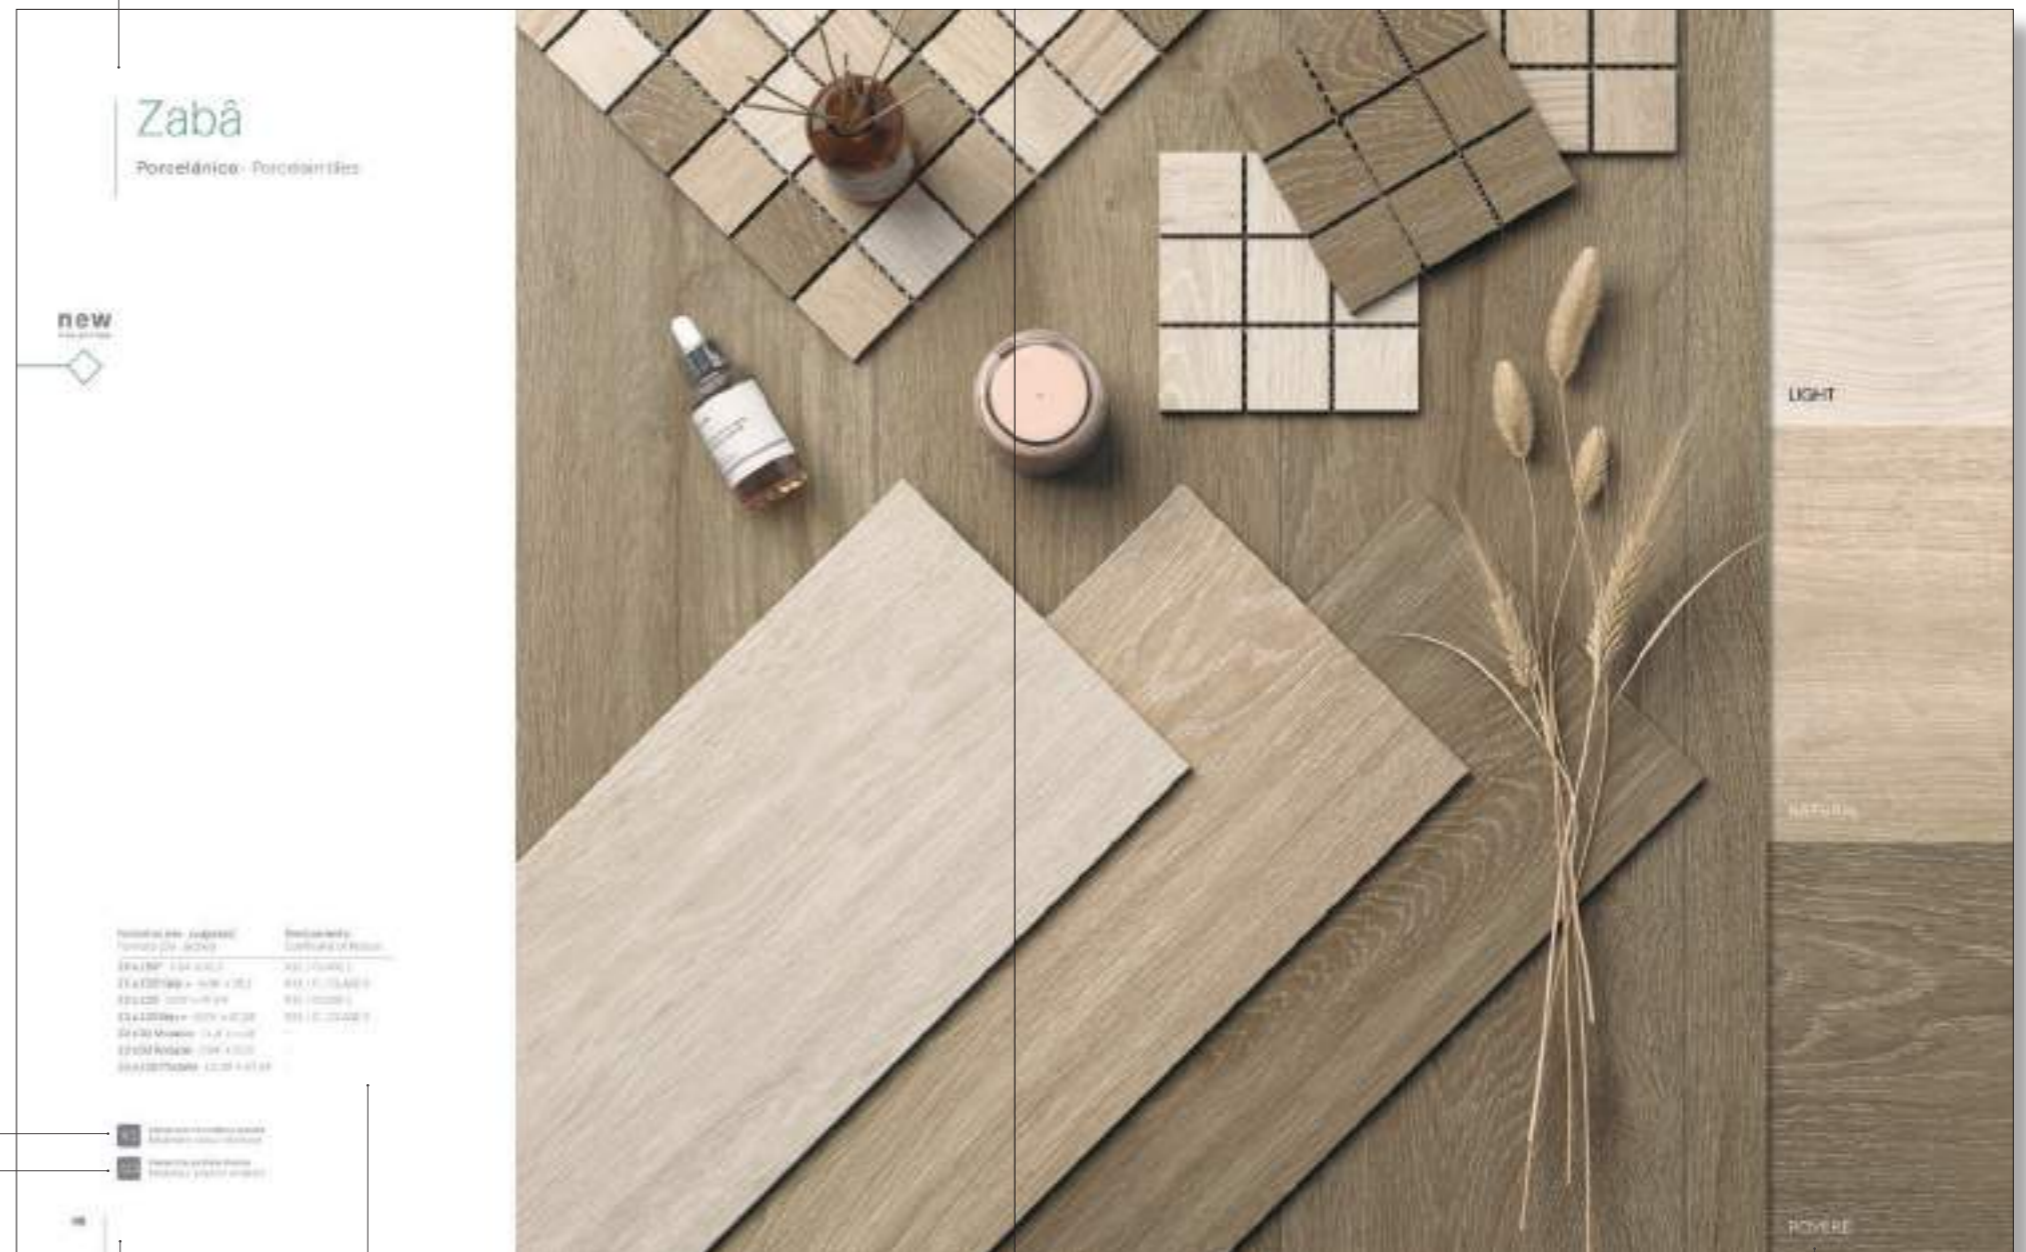

| | | | |
|---------------------|------------------------------------|---------------------------------------|---------------------------|
| G1 | G2 | G3 | G4 |
| Uniforme Uniform | Variación leve Slight variation | Variación media Moderate variation | Variación alta Uniform |

¿QUÉ SIGNIFICA G1, G2, G3, G4?
Indica el nivel de variación gráfica –entendida como diversidad de diseños– dentro de la misma colección y puede diferir, asimismo, según el formato. Se establece una escala del 1 al 4, en la que 1 (G1) indica poca o nula variedad gráfica (uniforme); 2 (G2), una variedad leve; 3 (G3) variedad media; y 4 (G4), variedad alta.

WHAT DOES G1, G2, G3, G4 MEAN?
Indicates the degree of graphic variation –understood as the diversity of designs– within the same collection and it can also vary depending on the format. The scale goes from 1 to 4, where 1 (G1) indicates little or no graphic variation (even); 2 (G2), slight graphic variation; 3 (G3) medium graphic variation; and, 4 (G4) high graphic variation.

Duplo

Duplo añade las ventajas de sus 20 mm de espesor a las propiedades del mejor porcelánico.

Además de su gran resistencia, que lo hace inalterable a la intemperie, el gran espesor de Duplo permite múltiples opciones de colocación, convirtiéndolo en una versátil solución todo terreno. Y todo ello sin renunciar al estilo de tu casa. Con Duplo podrás armonizar el interior y el exterior de tu vivienda.

Duplo combines the advantages of 20mm thickness with the properties of the best porcelain. In addition to being highly resistant, making it weather-proof, the large thickness of Duplo means it can be applied in numerous different ways. This makes it possible to fit the tiles in numerous different ways, transforming it into a versatile all-terrain solution. Moreover, all of these benefits are provided without detracting from the style of your house. Duplo can be used to harmonize your home's interior and exterior spaces.

DUPLO
THICKNESS
20
mm

Colores y formatos

Duplo es nuestra gama de gres porcelánico de 2cm de espesor, ideal para uso exterior debido a sus altas prestaciones antideslizantes y técnicas. Con efectos piedra, madera y cemento y un total de 34 colores diferentes, ofrece gran cantidad de opciones para construir con pasión todos los proyectos que tienes en tu cabeza. Una cerámica que mantiene todas las propiedades inalterables en el tiempo.

Duplo is our range of 2cm thick porcelain stoneware, which is ideal for outdoor use due to its high non-slip and technical properties. Featuring stone, wood and cement effects and a total of 34 different colours, it offers a wide range of options so that you can build all the projects you have in mind. All of this ceramic's properties remain unchanged over time.

Duplo, en cualquier espacio

Duplo es ideal para los ambientes más exigentes. En los espacios comerciales el tránsito es elevado y los pavimentos están sometidos al desgaste continuamente, es aquí donde los 20 mm de Duplo despliegan todo su potencial. Además, arquitectos y diseñadores crean con Duplo jardines sofisticados y acordes a las piscinas más espectaculares. Las múltiples posibilidades de colocación y la gran variedad de colores que ofrece, hacen de Duplo la cerámica definitiva para exteriores.

Duplo is ideal for the most demanding environments. In commercial spaces, there is a high level of traffic and paving is subjected to continual wear, this is where the 20 mm Duplo range all of its potential. Also, architects and designers create sophisticated gardens and the most spectacular swimming pools using Duplo. The multiple fitting options and the large range of colours on offer, make Duplo the definitive ceramic for outdoors.

Consejos de colocación

ADVISE OF LAYING

PARA FORMATO RECTÁNGULAR

Para la correcta colocación de los productos cerámicos, es necesario que tanto las superficies horizontales como verticales, estén completamente planas y sin presencia de residuos.

Como material de agarre se utilizarán cementos cola especiales para porcelánicos, aplicándose doble encolado en pieza y soporte, extendiéndose con llana dentada.

Por las características rectangulares de las piezas se aconsejan las colocaciones siguientes:

FOR RECTANGULAR FORMAT

In order to correctly lay the ceramic products, it is necessary to have horizontal and vertical surfaces completely flat and without any residues.

For porcelain materials, special quick-drying must be used as the adhering material, using double spread gluing on both the piece and the stand, and applying it with a square notch trowel.

Due to the rectangular nature of the pieces, we recommend the following laying process:

PARA LAS GRANILLAS PULIDAS:

COLOCACIÓN:

1. Antes de la colocación, extender varias piezas para obtener una superficies mínima de unos 9 m², y comprobar el efecto estético final, usando piezas mezcladas de varias cajas.
2. No marcar con lápiz ni con rotulador la superficie de las balosas.
3. Para el corte del material se recomiendan máquinas eléctricas con discos para porcelánicos, refrigerado por agua para los cortes rectos y radial para los curvos.
4. Mientras dure la obra, proteger la superficie con cualquier medio adecuado para garantizar el brillo y evitar que se raye o deteriore.
5. Usar un cemento cola específico.
6. Para colocar e igualar las piezas usar una maza de goma blanca, nunca negra o gris.
7. En los rectificadores se recomienda dejar una junta mínima de 1.5 mm.
8. Una vez rejuntado, limpiar la superficie inmediatamente con una esponja húmeda antes del endurecimiento definitivo del material de rejuntar.

LIMPIEZA:

Limpiar con un paño húmedo y alcohol de quemar las piezas después de su colocación.

Para su mantenimiento se recomienda usar una mopa seca sin aplicar productos cerosos.

FOR POLISHED FINISHES:

PLACEMENT:

1. Before placement, extend several pieces using different and mixed boxes to obtain a minimum surface of 9 sq. m, in order check the final aesthetic effect.
2. Do not mark the surface of the tiles with pencil or pen.
3. To cut the material watercooled electrical machines with disks for porcelain are recommended.
4. During the work, cover the surface with any appropriate means to protect the brightness and to avoid scratching or damage.
5. Use a specific adhesives for porcelain tiles.
6. To place and match the pieces use a white rubber hammer, never black or grey.
7. For rectified tiles a minimum joint of 1.5 mm is recommended.
8. After grouting, clean the surface immediately with a damp sponge before definitive hardening of grouting material.

CLEANING:

After placement clean with a damp cloth and denatured alcohol. For maintenance, it is recommended to use a dry dust cloth without applying any waxy products.

PARA DUPLO

SOBRE HIERBA

A. Preparación del suelo

Coloca las piezas directamente sobre una superficie de hierba uniforme con el fin de que dejen su huella sobre la misma.

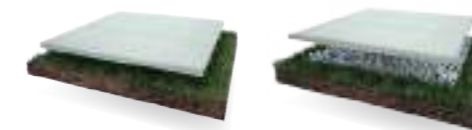

Retirar las piezas y escavar la hierba aplastada una profundidad de 5-6 cm.

Rellenar los huecos con una capa de granilla fina de unos 3 cm de profundidad.

B. Colocación de las piezas de duplo

Colocar las piezas sobre el lecho de grava de manera que queden ligeramente encastradas en el terreno.

Compactar y nivelar con listón y martillo de goma.

ON GRASS

A. Preparing the ground

Place the tiles directly onto a uniform grass surface in order for them to make an imprint.

Remove the tiles and dig into the grass to a depth of 5-6 cm.

Fill the holes with a fine layer of gravel about 3cm deep.

B. Fitting duplo tiles

Fit the tiles lightly on the bed of gravel in such a way that they are lightly fitted into the ground.

Compress and level out with a bar and rubber hammer.

SOBRE PLOTS

A. Preparar la estructura de soportes

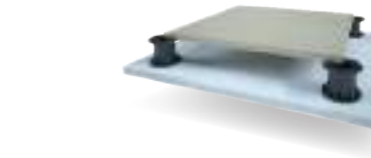

Disponer los soportes regulables sobre la superficie de colocación.

Ubicarlos de modo que cada uno se sitúe en los vértices de las piezas, tal y como se muestra en la imagen.

CONSEJOS DE COLOCACIÓN

B. Colocación de las piezas de duplo

Colocar las piezas sobre los soportes y nivelarlas usando el sistema de regulación de los mismos.

ON PLOTS

A. Preparing the support structure

Have the adjustable supports on the fitting surface.

Fit them in such a way that each one is placed on the vertexes of the pieces, as shown in the image.

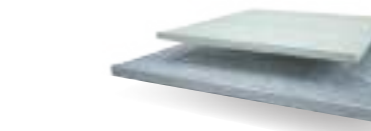

B. Fitting duplo tiles

Place the tiles on the supports and level them out using the adjustment system of the supports.

SOBRE CEMENTO

A. Colocación de las piezas duplo

Colocar las piezas con un adhesivo adecuado para porcelánico, aplicado siguiendo las instrucciones del fabricante. Para conseguir una superficie uniforme y compacta, se aconseja utilizar la técnica de doble encolado, sobre todo en pavimentaciones que vayan a ser sometidas a altas cargas. Mantener una junta de colocación entre piezas contiguas y rellenarla utilizando un material de rejuntado específico para casa uso. Respetar las juntas de movimiento previstas.

B. Limpieza inicial

Tras la instalación de las piezas, realizar una limpieza final de obra, con el fin de eliminar los restos cementosos que puedan quedar en superficie.

ON CEMENT

A. Fitting duplo tiles

Fit the tiles using an adhesive that is suitable for porcelain, and apply according to the manufacturer's instructions. In order to achieve a uniform and compact surface, it is recommended that you use a double adhesion technique, particularly with paving tiles that will be subjected to heavy loads. Keep a fitting board between adjoining tiles and fill it with grout designed for the purpose. Respect the predicted movement of spaces.

B. Final cleaning

After installing the tiles, carry out a final clean of the finished work, in order to get rid of any cement waste that remains on the surface.

SOBRE GRAVA

A. Preparación del suelo

Se recomienda una base de, al menos, 10 cm de espesor de grava de grano mixto con una ligera pendiente para que desagüe.

Nivelar el terreno y aplanarlo antes de colocar una malla de tejido que impida el paso de vegetación, y, sobre la misma, un lecho de gravilla fina de otros 10 cm de espesor.

Nivelar el terreno con listón y martillo de goma.

B. Colocación de las piezas de duplo

Coloca las piezas Duplo cuidando de una buena planicidad del solado y una correcta alineación de las juntas, que deben tener 4 mm como mínimo.

ON GRAVEL

A. Preparing the ground

It is recommended to use a base of mixed grit gravel that is at least 10 cm thick and slightly sloping in order to aid drainage. level the ground and flatten it out before placing a wire mesh over it that will prevent vegetation, and on top of that, place another fine bed of gravel that is 10cm thick. level out the ground using a bar and rubber hammer.

B. Duplo tiles

fit the duplo tiles taking care to ensure the tiling is flat and that the spaces between tiles are correctly aligned, these should be at least 4mm.

SOBRE ARENA

A. Preparación del suelo

Debemos disponer de una capa de arena de, al menos, 5-10 cm de espesor.

Compactar y nivelar el terreno con listón y martillo de goma.

B. Colocación de las piezas de duplo

Colocar directamente las piezas Duplo según la configuración deseada.

Compactar y nivelar de nuevo con listón y martillo de manera que la base del solado quede a la altura del terreno.

ON SAND

A. Preparing the ground

You should have a layer of sand that is at least 5-10cm thick.

Compress the tiles down and level out the ground with a bar and rubber hammer.

B. Fitting duplo tiles

Directly fit the Duplo tiles according to your preferred configuration.

Compress the tiles down and level them out again with a bar and hammer so that the base of the tiling is level with the ground.

Colorker no se hace responsable ante cualquier otro tipo de colocación.

Coloriker is not responsible for alternative methods used when installing this product.

1. PREPARACIÓN DEL SOPORTE

La colocación de baldosas cerámicas siempre debe ser realizada por personal profesional experimentado. Deben elegirse las herramientas y útiles adecuados. **Las superficies, tanto de suelos como de paredes, deben estar perfectamente niveladas**, pudiéndose emplear morteros de regulación o nivelación, incluso capas impermeabilizadoras, de drenaje, etc, si la situación lo requiere. **Las superficies deben estar totalmente limpias antes de aplicar el mortero de agarre o el adhesivo.** Utilizar una adecuada iluminación, recomendándose la utilización de lámparas o focos para observar el ajuste dimensional.

PREPARATION FOR THE TILE SETTING

The laying of ceramic tiles must always be carried out by an experienced professional.

Always use the appropriate tool and equipment.

The surfaces, whether it be floors or walls, must be perfectly levelled.

For this purpose, a regulating or levelling mortar can be used, or even water-proofing or drainage layers, etc, if the situation requires it.

The surfaces must be completely clean before applying the mortar or the adhesive. Use adequate lighting, the use of lamps or spotlights is recommended in order to see clearly the dimensional alignment.

2. ELECCIÓN DEL ADHESIVO Y SISTEMA DE COLOCACIÓN

La elección del adhesivo viene definido por el tipo de baldosa cerámica (el grupo al que pertenece y el formato), por el tipo de la superficie a revestir (material) y por el uso del recinto.

La elección del sistema de colocación depende de la ubicación de la obra (exterior o interior) y de las dimensiones de la baldosa cerámica.

Se recomienda consultar con su distribuidor Colorker®.

Se recomienda una colocación en capa fina frente a la colocación en capa gruesa.

Se recomienda realizar doble encolado para baldosas que tengan alguno de sus lados con una longitud superior a 30 cm. Esta técnica se realiza aplicando adhesivo tanto en el soporte como en la baldosa, cubriendo toda la superficie de las mismas.

CHOICE OF ADHESIVE AND METHOD OF APPLICATION

The choice of adhesive is defined by the type of ceramic tile (The group to which it belongs and its format), the type of surface to be covered (material) and the purpose of the tiled area.

The choice of tiling method depends on the location of the site (outside or inside) and the dimensions of the ceramic tiles.

It is recommended to contact the dealer and to follow the instructions of the manufacturer.

It is recommended to use a fine layer as opposed to a generous one.

It is recommended to use double the adhesive with those tiles which have one or more sides longer than 30cm. This technique is achieved by placing adhesive both on the tile setter and on the tile, completely covering their surface.

3. CUIDADOS ESPECIALES DURANTE LA COLOCACIÓN

Utilizar crucetas o estrellas de tamaño adecuado según la junta para mantener la ortogonalidad del montaje. En colocaciones trabadas o a contrapunta se recomienda que esta no supere el 15% de la longitud del lado más largo.

Comprobar el material ya colocado cuando el adhesivo está todavía fraguando con el fin de corregir pequeñas variaciones.

SPECIAL CARE DURING SETTING

Use crosses or stars of the appropriate size according to the joint, in order to maintain the orthogonality of the setting.

If to be set in a brickwork style or at a counterpoint, it is recommended not to surpass 15% of the longest side.

Check the material applied while the adhesive is still setting, in order to correct small variations.

4. EL REJUNTADO

Las juntas son un elemento necesario para la conservación de las instalaciones.

Existen varios tipos de juntas en una obra:

A. Juntas estructurales:

Están diseñadas para absorber los movimientos de la edificación y siempre deben respetarse. Pueden ser tapadas con perfiles adecuados y llenadas con materiales indicados.

B. Juntas perimetrales:

En todas las uniones pared-suelo. El ancho mínimo será de 8 mm. y deben de estar vacías o rellenas con material deformable. Son disimulables con el rodapié o el azulejo de pared.

C. Juntas de colocación:

Es la separación que se deja entre las baldosas. Se considera colocación con junta cuando la separación es mayor o igual de 1,5 mm, y separación sin junta cuando es menor de 1,5 mm, debiendo dejar siempre una separación mínima de 1,5 mm.

Antes de iniciar el rejuntado, esperar que el mortero de agarre o el adhesivo este totalmente endurecido.

Las juntas tienen que estar limpias y exentas de polvo y partículas.

Efectuar el relleno o sellado de las juntas utilizando una llana de goma dura, sin dejar vacíos los desniveles.

Eliminar el exceso de junta de la superficie moviendo la llana diagonalmente a las juntas, cuando la mezcla

este todavía fresca.

Retirar los residuos con la misma espátula.

Es importante consultar con el distribuidor para elegir la junta adecuada al tipo de baldosa y el color que se quiera utilizar por estética.

Siga siempre las indicaciones de su distribuidor Colorker®.

GROUTING

The joints are a necessary element for the conservation of the premises.

There are various types of joints in a site:

A. Structural Joints:

These are designed to absorb movements in the building and must always be respected.

They can be covered with adequate profiles and filled with the indicated materials.

B. Perimeter Joints:

All joints where the wall meets the floor. The minimum width will be 8mm and must be empty or filled with a deformable material. They can be concealed with the skirting board or the wall tile.

C. Setting Joints:

These are the spaces left between tiles. The setting will be considered to have a joint when the space between each tile is greater than or equal to 1.5 mm. For spaces of less than 1.5 mm, there is considered to be no joint. There should always be a minimum gap of at least 1.5 mm.

Before starting to apply the grout around the tiles, ensure that the mortar or adhesive is completely hard.

The joints must be completely clean and free from dust and particles.

Refill or seal the joints with grout using a grout float of hard rubber, without leaving spaces or uneven levels.

Remove any excess grout from the surface by moving the grout float in a motion diagonal to the joints, while the mixture is still fresh. Remove any residue with the same spatula. It is important to consult the dealer when choosing the grout that is adequate for the tile and the colour that is the most aesthetically appealing. Always follow the instructions of the manufacturer.

5. TERMINACIÓN DE LA OBRA

Una obra no está acabada hasta que no está entregada.

Limpieza de las juntas:

Respetando los tiempos del fabricante, limpiar con un trapo de hilo húmedo toda la superficie, incluido el rejuntado. Al secar puede quedar una capa o velo en toda la superficie, que puede ser limpiada con agua. No dejar pasar mucho tiempo para limpiar los restos de juntas.

Limpiar los restos de obra con productos adecuados.

Consultar con el distribuidor y nunca emplear productos que contengan Ácido Fluorhídrico HF.

Protección de las superficies realizadas para evitar impactos, abrasiones, etc.

El mantenimiento de las baldosas cerámicas es sencillo y cómodo.

Se pueden emplear productos específicos para cada tipo de baldosas respetando las indicaciones del fabricante de productos.

Consulte con el distribuidor.

Se aconseja al colocar, mezclar piezas de varias cajas. Verificar antes de colocar: Tonalidad, Calibre y Clase. No se admiten reclamaciones referentes al material colocado.

FINISH THE JOB

The job is not over until it has been fully completed.

Cleaning the joints:

Respect the times advised by the manufacturer, clean the whole surface with a damp linen cloth, including the grout. When drying there may appear a veil or coating on the surface, this can be cleaned with water.

Do not wait too long before cleaning the remaining joints.

Clean the rest of site with the appropriate products.

Contact the dealer and never use products that contain Hydrofluoric Acid HF.

Protect the surfaces already set against impacts, abrasions, etc.

Maintenance of ceramic tiles is easy and convenient. Specific products can be employed for each type of tile. Carefully follow the instructions of both the manufacturer of the tiles and the manufacturer of the products. Contact the dealer for advice.

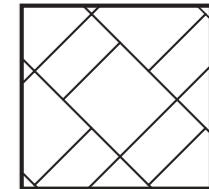

It is advised on having placed to mix pieces of several boxes. To check before placing the tonality, the calibre and the class. Are not admitted claims relating to the placed material.

5. COMBINACIÓN DE FORMATOS:

A continuación recomendamos un ejemplo para combinar los formatos 60 x 60 y 30 x 60. También mostramos el porcentaje de piezas necesarias.

EXAMPLES OF SIZE COMBINATIONS:

Hereunder we recommend you an example of 60 x 60 and 30 x 60 sizes combinations showing the percentage of pieces needed.

VIARIOS / VARIOUS
(60 x 60 + 30 x 60)

- 60 x 60 = 67%
- 30 x 60 = 33%
